and NSD File No. L-00-72.

Dear FCC:

My wife and I carry a Tracfone in our car for emergencies. We use Tracfone because we are on a limited budget and cannot afford a more premium service. Now you are trying to add to our monthly phone service. Have you thought about all the cell phones that are now in service that are paying monthly fees into your coffers? What are you doing with all that money? While the economy is down and people are being laid off by the thousands, you are trying to jab us with your extra costs. Do like all private business is doing, work smarter and improve productivity. If it is good for us it is good for you.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,

Ed Hakala
